

## TYGRIS TECHNICAL DATA SHEET

Industrial Maintenance Aerosols

Motorcycle Chain Wax

CODE: R-273

Premium chain lubrication for high performance

A high performance lubricant particularly suited for motorcycle chains. It protects against corrosion and wear and its tenacious formulation forms a water-resistant film which is easy to apply and gives long-lasting protection. The lubricant leaves the can in a semi-liquid form, thereby penetrating the chain links and subsequently thickens to a waxy consistency which is not sticky. This ensures that road dirt does not adhere, reducing wear dramatically when compared to polymer chain lubricants.

Benefits:

- Highly tenacious-resistant to flinging off
- Protects against rust and wear
- Water resistant
- Penetrates easily, then thickens
- Resistant to adherence of dirt

Technical Data:

Appearance: Off-white grease  
Odour: Characteristic  
Contents: Blend of wax, zinc oxide, naphtha, white spirit and hydrocarbon propellants  
Storage: Below 50°C  
Solubility: Insoluble in water  
Flash Point: >0°C  
Pack Sizes: 12 x 400ml cans  
Directions for Use: Shake can well. Spray onto chain from about 10-20cm. Leave 2-3 minutes before use as grease will penetrate and thicken
